Technology is present in our lives and in almost all the things that surround us.

Technology is involved in our health, knowledge, transport and many other things.

Although it has some negative parts, in general, technology enables us to communicate, have a better life and many other advantages.

Erasmus+

Erasmus+

WE ARE EUROPE

Project Number 2014-1-ATO1-KA201-001016

Firstly, we are going to explain some advantages and disadvantages of the use of technology.

Secondly, we are going to present some of the electronic equipment that people of Portugal, the United Kingdom and Estonia have in their countries and technological services.

Finally, we are going to talk about some advantages of technological developments in medicine, transport and other contributions.

Information

Technology, in today's world, influences almost everything. It has some advantages and disadvantages, and although it has dangers, it's useful for our lives.

Some of the advantages of technology related to information are:

- Do research for schoolwork;
- Widen your knowledge.

Technology is present in almost everything in the world, and its evolution has brought us lots of advantages over time. In Medicine, transport and many other things where technology's evolution has been useful, the benefits have grown a lot, and the help it gives us is huge. We can move more easily and go to other places faster. We can also have a better life, with the contributions that the evolution of technology has brought to us. We can undergo different types of surgery, transplants and many other things.
